## DOSSIER FILE: CATCH ETHERIA SMITH! QUINTETRAHEDRONICON <br> CASE OFFFCERS: JAMFE ECKMAN, JENNFFER CHADFAN, \& CHRFS mOOKR FeDERAL BUKEAU OF FNVESTFGATFON

The pieces for this puzzle should be printed in color.

You need to reassemble this device, which may be the key to recovering the Space Needle. There are sixty pieces altogether. You probably don't need every fragment to successfully activate the Quintetrahedronicon, but you're likely to need nearly all of them.

The Quintetrahedronicon is obviously not a very sturdy artifact. As you begin the reassembly process we recommend reinforcing it with museum-grade molybdenum support struts. Wooden coffee stirrers from the dining car will probably work, too.

Finally, although Mulder cannot help you decipher the clues on each blade of the Quintetrahedronicon, he can verify, for each blade, whether or not you have deciphered them correctly. Submit answers for verification through the answer submission page.
